

Are your ERP Applications aligned with your Business Operations?

Knowledge Solutions provides Assessment services for clients who want to determine if they are maximizing utilization of their ERP Software or just need reassurance that they are using the software as designed. Our assessment staff is comprised of experts with years of experience in Finance, Human Resources, Payroll, Procurement and Supply Chain management. This unique service will help you leverage your investment and provide recommendations on ways to better utilize the ERP Systems and Applications.

Knowledge Solutions helps you identify how to better utilize your ERP Applications to meet you business needs and streamline your day to day operations and processes.

Our Assessment Methodology

- Conduct Staff Interviews to determine how you use the system currently and where there is opportunity for improvement.
- Review Current Setup and Use of Applications.
- Identify areas where staff could use additional training.
- Identify quick solutions to create efficiencies and tips for better utilization of your ERP Applications.
- Create a comprehensive report of findings with suggestions, recommendations and procedures on how to implement them.

Benefits our Customers Achieved

- Faster month-end close timeframes.
- Standardized reporting which eliminates redundant copies of the same information.
- Improved end-user productivity due to a better understanding of the how the applications operate.
- The applications are more closely aligned to the day to day business processes which enable process improvements and fewer workaround solutions.
- New understanding of how the application screens operate which eliminates bottlenecks.
