

Is There Such A Thing as Too Much Information?

Data overload is a common problem most companies face, especially due to an increasing number of ERP and operational systems transactions. Today, companies are finding themselves inundated with hundreds of terabytes of new data every year.

Knowledge Solutions Business Intelligence Practice can help you translate your data streams into smart management tools.

Providing companies access to well-organized and actionable information is the basis for our Business Intelligence Practice. The goal is to deliver what you need to know, when you need to know, and in a format that is easy to understand.

Knowledge Solutions successfully delivers enterprise-wide information management solutions that enable executives and decision makers to make timely and informed business and strategy decisions by integrating technology with business processes and policies.

Are you crunching the numbers or are they crunching you?

Key disciplines include:

- Capturing, consolidating, and mining data
- Information Management and Data Warehousing
- Integration of multiple databases/data sources
- Scorecard / Dashboard Implementation
- Providing focused analytics utilizing Cognos™, MicroStrategy™, Hyperion™, Business Objects™, and other tools including our own products.

**Real Industry Challenges.
Real Time Solutions.
Real Value and Benefits.**

Knowledge Solutions' senior consulting team brings years of experience in business management, HR / Payroll, Finance, Procurement and Supply Chain. We have combined that knowledge with Business Intelligence to optimize processes and policies in order for companies to increase ROI. Our senior leadership team has been providing services and support to our clients for over 20 years, and we are continuing to invest in solutions and services that meet the demands of a real-time industry – where Business Intelligence can add up to millions of dollars in increased profits.

Our Business Intelligence Practice offers a menu of components to support your data management and business decision needs.
