

Information available when you need it!

In today's business world, executives and managers are on the move and require decision-making capabilities when they need it and where ever they are. Decision requests and information are required to happen real-time, organized and accurate in this fast-paced economy. Corporate associates have a need to become more empowered through the ability to take action with the information presented. Knowledge Solutions' Mobile Requisition Solution enables mobile devices (such as iPhone, iPad and Android) to become decision-making tools. The solution provides real-time requisition (e.g., Job, Supply and Invoice) requests from Lawson's ERP system through industry leading mobile devices. In addition, the solution provides the ability to post comments on the request (e.g., for further information), leverages Lawson's Process Flow Professional, as well as common mobile services such as email, phone and SMS for communication. Backed by Knowledge Solutions' ERP Practice, the mobile device is no longer just for making calls; it is a management tool.

Knowledge Solutions Mobile Requisition Solution for Lawson ERP enable corporations to obtain:

- Interactive, real-time business information anytime and anywhere
- Job, Supply and Invoice requisition decision making and workflow capabilities
- Centralized requisition comments using Mobile Community Communication
- "Favorite" and personalized requisition reports for an individual's customized needs
- True mobile app technology and security; not just email with a link
- Real mobility across corporate and public Wi-Fi networks

Mobile Requisition Benefits

Confidence: Ensures customer and company confidence in the completeness and accuracy of information.

Security: All data transmission to the mobile device is encrypted. Application login and password protection is available.

Reliability: Backed by proven mobility methods, technologies and practices, information presented represents the true nature of the business.

Control: Real-time information and Mobile Community Communication enables executive feedback and direction.

Enlightenment: Integrates data from Lawson's ERP system.

Extensibility: Scalable platform that can grow from small to enterprise to meet the needs of your expanding business.
