

## Information available when you need it!

In today's business world, executives and managers are on the move and require information when they need it and where ever they are. Information from such systems as CRM, ERP, POS, Inventory, Requisition and HR are required to come in real-time, organized and accurate. Corporate associates have a need to become more empowered through the ability to analyze, and more importantly, to take action with the information presented. Knowledge Solutions' Enterprise Mobile Solution Suite enables mobile devices (such as iPhone, iPad and Android) to become analytical and decision making tools. Applications that provide interactive reports, scorecards/dashboards and action requests integrate with other mobile device capabilities such as email, phone and SMS to give the executive the ability to act and to communicate. Backed by Knowledge Solutions Business Intelligence and ERP Practices, the mobile device is no longer just for making calls; it's a management tool.

### Key Knowledge Solutions' Enterprise Mobile solutions include:

- **Mobile Requisition** – Approval and decision capabilities for Job, Supply and Invoice requisites
- **Mobile Order-To-Cash** – reports and performance monitoring capabilities to track the monetization of sales and orders
- **Mobile Revenue Assurance** – reports and performance monitoring capabilities to track revenue leakage
- **Mobile Scorecard** – ability to monitor a corporation's or a divisions progress against metrics of success

### Enterprise Mobile Benefits

**Confidence:** Ensures customer and company confidence in the completeness and accuracy of information.

**Security:** All data transmission to the mobile device is encrypted. Optionally, application login and password protection is available.

**Reliability:** Backed by proven ERP, BI and data warehousing methods, technologies and practices, information presented represents the true nature of the business.

**Control:** Real-time information and Mobile Community Communication enables executive feedback and direction.

**Enlightenment:** Integrates data from various systems for cross-department and in-depth corporate analysis.

**Extensibility:** Scalable platform that can grow from small to enterprise to meet the needs of your expanding business.
