

Data Center and Hosting Services

Knowledge Solutions state-of-the-art Data Center provides our Clients business continuity, 24x7 operational support and availability along with robust and redundant electrical systems, HVAC infrastructure, multi-provider network access, and advanced physical security. Dual-path, high-speed, fiber-optic communications virtually eliminates the risk that data connections will be severed. An uninterruptible power supply with back-up 80kw diesel generator provides 120/280v, 3-phase power with the ability to remain operational during any conceivable disaster. Our Red Bank, New Jersey facility and operations have undergone a SAS 70 Type II audit that is necessary for clients who must meet regulatory compliance standards required by SOX, SEC, NASD, GLB, and HIPAA. The facility is protected by a sophisticated, multi-layer security system that includes video surveillance and secured access.

Examples of our Services include:

- Server Administration
