

Is your Budget Process integrated with your Financial and HR / Payroll Applications?

Knowledge Solutions provides implementation services and solutions for the Lawson Budgeting & Planning Version 9 Application. Our resources are certified on Lawson's Budgeting & Planning Application and have successfully implemented the product at multiple client sites. To ensure a successful implementation, we provide turn-key solutions which include detailed planning to understand your current business processes, application configuration, data conversion, application testing, training and knowledge transfer.

Knowledge Solutions helps you identify how to leverage Lawson's Budgeting and Planning Application to streamline your budgeting process and provide visibility into the details that supports your financial assumptions.

Lawson Budgeting & Planning Version 9 delivers a scalable, central or distributable budgeting, planning and forecasting solution. It is a web based application that allows you to create and manage a department budget. Department budgets are comprised of financial information, such as expenses and revenue and workforce information such as employees and positions.

The Lawson Budgeting & Planning Application is fully integrated to the Lawson Back Office applications, which means that existing Lawson General Ledger and Human Resources structures are used to create budgeting and planning structures. For any portion of applications not on Lawson there is a utility within the application that's allows for easy uploading of data from Excel spreadsheets that has been extracted from legacy systems.
