

Are your Lawson Applications approaching data overload?

In a typical Enterprise, approximately 80% of the data is inactive yet remains in production systems. This data overload can cripple system performance and reduce productivity.

Unmanaged Application Data Growth:

- ❖ *Decreases Application Performance*
- ❖ *Increases Infrastructure Costs*
- ❖ *Detracts Resources from Key Initiatives*

Our extensive experience purging Lawson Financial, HR/Payroll and Procurement data allows us to unlock the right solution for your data archiving needs. We work directly with both your Business and Technology teams to develop a standardized purge process that is aligned with the business needs of your Company.

Benefits of Data Purge & Archiving

- ◆ Improve performance of on-line and batch applications.
- ◆ Create an easy to maintain environment.
- ◆ Faster backup and recovery time.
- ◆ Minimize data conversion time during upgrades.
- ◆ Minimize data conversion time during refresh of test environments.
- ◆ Maintain a stable data management strategy for all Lawson environments.
