

Are you reaping the benefits and cost savings from your Lawson Procurement and Materials Management Investment?

Knowledge Solutions can help you leverage Lawson Procurement to drive inefficiencies and hidden costs out of your purchasing activities. Through process automation, strengthened internal controls, and increased visibility to purchasing activities, the Lawson PO / Materials Management application can support your goals to consistently obtain the right products and services at the best possible price and to bring consistent accuracy, reliability, and timeliness to order fulfillment. Our team of experienced Lawson Procurement, Inventory Control and Materials Management business consultants can add immediate value to your project by flushing out opportunities to save costs and create efficiencies.

Knowledge Solutions provides insight into Lawson's PO Applications that can help streamline the Procurement process and provide visibility into the details that support your financial assumptions.

Research reveals that organizations with automated supply chain processes have, on average, a 57% lower cost per purchase order, 53% less cost per receipt, and 34% faster processing of requisitions and purchase orders, compared with industry norms.

Knowledge Solutions specializes in:

Procurement: Integrate Procurement with the other Lawson Applications including Receiving, Accounts Payable, Fixed Assets and General Ledger.

Requisitions: Create and route purchasing requests over the web.

Inventory Control: Automate your inventory processing, supply levels and reorder points to meet your business needs.

Purchase Order: Use the Web to effectively establish pricing agreements, vendor contracts and create PO's.

Mobile Supply Chain / R&D: Use wireless hand-held devices to enhance receiving, delivery and inventory management processes.

Self Service Capabilities: Automate the requisition process by allowing internal customers to create their own requisitions on-line. Then route for web based approvals.
